

# 60" BRAVIA Professional Full HD screen

**FWD-60NX720P**  
Professional LED Display

At an impressive 60 inches, with an incredibly slim profile, the FWD-60NX720P brings the acclaimed performance and style of the established Sony BRAVIA screen technology to high-quality digital signage. This monolithic screen can truly enhance any office, educational, retail and venue environment - bringing smart digital messaging to all.

The FWD-60NX720P features Full HD resolution, Dynamic Edge LED backlight, Motionflow XR 200 and a Light Sensor for bright, clear images; plus stunning 3D capability means that you can choose to enhance your presentations using this latest technology.

The FWD-60NX720P comes bundled with an HDMI-RS232C converter box and a 3-year warranty for professional use.

## Key Features

### **Dynamic Edge LED** Incredible contrast with Dynamic Edge LED backlight

High contrast makes your screen images vibrant and Sony achieves infinite dynamic contrast ratio with the Dynamic Edge LED Backlight. This system adjusts backlight brightness according to the picture content. Compared with conventional, fluorescent tube backlighting, the LEDs enable a thinner profile and higher energy efficiency, being around a third of the depth and consuming less power.

### **Standard External Control Terminals**

It comes with HDMI-RS232C converter box which enables external control of the display, for features like volume control and more.

### **OptiContrast Panel**

For high contrast pictures and detailed black tones on the screen as it minimises glare from the ambient light in the room.

### **USB Playback**

For easy, entry-level signage displays, you can play a variety of content straightaway from a USB memory stick, complete with looping and adjustable interval settings.

### **Light Sensor**

The Light Sensor ensures that the brightness of your screen is adjusted to the brightness of its environment. You get a great picture, save energy and it's automatic.

### **Intelligent Presence Sensor**

Using a built-in camera, with 'face detection' and 'motion detection', the Intelligent Presence Sensor switches the screen into Standby mode to save power when nobody is watching.

### **Internet Capability**

All models feature RJ45 input and WIFI capability (with extra external accessories) allowing customers to surf the web via the built-in browser.

### **Skype™ Ready**

Now BRAVIA Professional owners can take advantage of free Skype-to-Skype Internet voice and video calls. Widely popular for PC-based phone calls, the Skype service is a great way to keep in touch with friends and family at little or no cost. Sony makes it easy – simply attach the dedicated Sony camera/microphone (sold separately).

### **3D Capability**

Stunning 3D capability means that you can choose to enhance your presentations using this latest technology.

### **Wide variety of input options**

Models can accept a wide variety of input sources, including 4 x HDMI, laptop, Blu-ray and DVD player.

### **Picture Frame Mode**

This power-saving mode comes as standard, allowing the screen to be used to show artwork or user-generated images as if it were a picture frame.

Specifications		
Model		FWD-60NX720P
Display Features	Inch Size	60"
	Backlight Type	Dynamic Edge LED
